DETAILED ACTION

This communication is responsive to the reply filed on 6/12/06. Claims 2-17, 20, and 24-41 are presented for examination.

Allowable Subject Matter

1. Claims 2-17, 20, and 24-41, after further consideration and search, are allowed over the prior art.

Reasons for Allowance

2. The following is an examiner's statement of reasons for allowance:

Claims 2-17, 20, and 24-41 are allowed over the prior art because the combination of Akira and Nagaora, as correctly argued by the Applicant in the 6/12/06 response, fail to teach and image display device for displaying an image in accordance with an input of a chrominance signal wherein, chromaticity coordinates values of the three primary colors are determined for external light from wavelength distribution characteristics of external light and optical wavelength distribution characteristics, and correction is performed on the chrominance signal so that image display is carried out based on the chromaticity coordinates.

Although the newly found reference assigned to Holm-Kennedy et al. (US5784507) teaches the use of distributed wavelength characteristics to discriminate optical wavelength radiation along a spectrometer, Holm-Kennedy et al. fails to teach the underlined claimed features in the manner recited in claims 2-17, 20, and 24-41 of the instant application.
